

BEST WAY TO RECORD READINGS WITH ONLY 1 DEVICE!!

**REDUCE THE HASSLES FOR TECHNICIAN TO OBTAIN THE READING
FOR YOUR BATTERY.**

COMES TOGETHER WITH ELECTROLYTE AND VOLTAGE PROBE

Patented

Specific gravity , Voltage, simultaneously

Safe: No fluid extraction

Nothing calibration

MEMORY: 1 to 99 cell 1 to 99 batteries

Transfer data :i USB port

Method of Detection : Optical sensor

Temperature : Automatic Compensation

Range 1.10-1.35

Measuring Time : 1"

Power Supply 3.7V rechargeable battery

*Warranty: 1 year

mm:120x80x35

optical sensor mm:120

Simple :insert probe and you read values,Push botton for memorise

Digital Optic Hydrometer the optical battery monitoring system is an innovative solution. We apply new methods for measuring and memorize battery conditions With optical measurement, users can analyze the battery in all aspects, specific gravity, voltage, and so on. This will reduce the time we spend on measuring capacity using a battery charging bench at another time.

OLD PRACTICE
